Online Seminars on Numerical Approximation and Applications OSNA^2

We are pleased to announce a new series of on-line seminars entitled "**Online Seminars on Numerical Approximation and Applications OSNA^2**".

The online series of seminars promotes the interchange among researchers working in the domain of numerical approximation and its applications, limited by the COVID-19 pandemic. Since participation in traditional conferences is difficult, the primary goal of these webinars is to share novel and attractive ideas via web suggested by experienced and early-career researchers. As second aim, the colloquia intend to bridge the gap between theoretical aspects of approximation theory and its applications.

OSNA^2 will start on November 9, 2020, at 17:00 (GMT+2) with two talks per day and week along four weeks.
For more information including the schedule of the talks please visit the website:
https://sites.google.com/unifi.it/osna2/home-page
and contact us for any questions at osna2.2020@gmail.com

Registration is needed to receive e-mails and virtual connection access to follow the seminars.

The organizers,

Rosanna Campagna, University of Campania "Luigi Vanvitelli", Italy
Costanza Conti, University of Firenze, Italy
Emma Perracchione, University of Genova, Italy
Victor Bayona Revilla, University Carlos III de Madrid, Spain
